How to make anonymous calls on android. Android app to make anonymous call. How to make anonymous call from samsung.

These changes are shown below. This only needs to be done once, ideally when launching the application. Maintain these methods in the MainActivity class as shown below. Add the call to initialize(), shown below, to the onCreate() method of the MainActivity class to perform the initialization of the Google Mobile Ads SDK. You will do all your coding in this code lab in the Android project located inside the working directory. public class MainActivity extends Activity { ... private RewardedVideoAd mRewardedVideoAd; ... activity_main.xml ... The RewardedVideoAd object requires notifications of the parent activity's lifecycle events. As with the string literals above, this value must be stored in the string source file, as shown below. You must set up the listener before loading an announcement. } Before going any further, a RewardedVideoAd object is required. Place the compilation declaration inside the dependencies section and the plugin application declaration at the bottom } @Override public void onPause() { mRewardedVideoAd.pause(this); super.onPause(); ... This can be determined by calling isLoading() on the RewardedVideoAd object. compile 'com.google.firebase:firebase-ads:10.2.4' } ... android:textAppearance="@android:attr/textAppearanceLarge" /> The Button's android:text attribute defines the text displayed on the button element. Before loading the ads, your application will have to initialize the Mobile Ads SDK by calling MobileAds.initialize() with the ID of your AdMob application. Once your build.gradle files are modified and everything is synchronized, try rebuilding your project (Run Application in the Run menu) to make sure it compiles correctly. The instance of the RewardedVideoAd object can be retrieved using the method ^ Handle rotation^ The last step is to make sure that the watch video is displayed after a rotation ^ The ^ shown below, to the MainActivity class, to set a ^ and El RewardedVideoAd. MainaTivity.java ... [{ ^ <Type>: ^ <Thumb-down>: ^ <Id>: ^ <TooClicatedToTo>: ^ <demasiado ^ <Id>: ^ <Died> ^ <€ thumb-down> ^, ^ < ^: ^ Samples / Code Issue ^ (^ < Dumb-down ^, ^ < ^: ^: ^ < Thumb-up ^, ^ < Id ^: ^ < SolvedmyMroblem ^, ^ < ^ < Solved My Problem ^: ^ < Thumb-Up ^, ^ < DIST ^, ^ < DIST ^: ^ > Other } Notes: ES IMPORTANT UNILIZARAR UN CONTEXTO THE ACTIVIDAD AND LUGAR DE IN CONTEXTO DE Aplicaci^N A Llarar.GethEdDanceDVideoDinStance (). import android.widget.toast; ... MREWARDVIDEOAD.SetrewardVideoAdListener () { @overRide Public Void (), toast.MAKTetext (), ^ ^ side Public Void OnRewardVideoeoadopened () { Toast.makeText (getBaseContext (), toast.len. .. Toast.litth short) .Show (); } @Override public void received () (Rewarditem Rewarditem) { toast.makeText (GetBaseContext (), toast.litth s Hort), Toast.lingThIt Short) .Show (); } @Override Public Void OnRewardVideoDpoead (int i) {int I} {int i} { (getBaseContext(), "âAd failed to loadâ", Toast.LENGTH_SHORT).show(); }); } } coin count In the onRewarded () method of the anonymous RewardedVideoAdListener class you just implemented, reward the user for viewing the ad by increasing the coin count by the reward amount. } ... dependencies { ... If at any time you are having problems, you can refer to the Android project located under the final directory. If the ad placement is configured for media, this context is passed to the media adapters, and several adapters require an activity context to load ads. What you will learn How to apply for rewarded video ads How to show rewarded video ads How to reward users for viewing ad content What you need For this code lab, you will start with Impossible Game, the game that is impossible to win. mGamePaused = false; mGameOver = false; // Upload a reward-based video ad mRewardedVideoAd.loadAd (getString (R.string.ad unit_id), new AdRequest.Builder ().build ();) In order for your application to present the user with the option to view an ad, you must modify the design file for your main activity, located in RewardedVideoExample/app/src/main/res/layout/activity_main.xml of your project. // Get the button "show ad", which shows a rewarded video when clicked. Following Android best practices, this value should be assigned to the string resource file located in the project's RewardedVideoExample/app/src/main/res/values/strings.xml. dependencies { ... It is recommended to call loadAd () as soon as possible. mShowVideoButton = ((Button) findViewById (R.id.watch_video)); mShowVideoButton.setVisibility (Ver.INVISIBLE); } Now, you want to make this button visible at the end of a game if an ad has been loaded and is ready to display. Scroll to the RewardedVideoExample project located below the working directory and select it. One ^ ^ ^ eldarg.dliub.sodasnepmocer oedâv ed adiv ed olcic ed sotneve sol acifiton el renetsIdAoediVdedrawer } .orec a agell ortem^Anorc le odnauc animret ogeuj le y adnor adac ed oipicnirp la ojab aicah ratnoc a azneimoc ... If both conditions are true, make visible the Video Show button. Like the ID of the ADMOB application, this value should also be assigned to the chain resource file located in RewardedVideOxample / App / SRC / MAIN / RES / VALUES / STRINGS.XML of your project. You can find the ID of your application in the Advob user interface. ca-app-pub-3940256099942544/5224354917 ... CA-APP-Pub-3940256099942544 ~ 3347511713 ... MainActivity.java import com.google.android.gms.ads.mobileads; apply plugin: 'com.google.gms.google-services' IF you see to warning Message Across The Top Of The Android Studio Window Indicating That Gradle Needs To Perform to Sync, Click Sync Now. } @Override Public Void OnDestroy () {mRewardedVideoAd.destroy (this); Super.OnDestroy (); ... Normally, you will download a Google-Services.json file from the Firebase console and you will include it in the App / Your App directory. MainActivity.java Private button mshowvideobutton; ... Java is a registered trademark of Oracle and / or its subsidiaries. Add a new entry to this file for the ADMOB application ID, as shown below. This will decompress a RAAZ folder (admob-rewarded-video-master), which contains a specific directory for Android or iOS. AA ^ ade the code that is shown below to make this call in the entire STARTGAME (), which is invoked at the beginning of each game. Mainactive.java public void onresume () {super.onresume (); ... MainActivity.java import com.google.android.gms.ads.adrequest; ... activity_main.xml "sloot/moc:diordna.samehcs/:pith"=sloot:snlmx "sloot/moc:diordna.samehcs/:pith"=sloot:snlmx "diordna/ser/kpa/moc:diordna.samehcs/:pith"=diordna:snlmx android:layout_height="match_parent" android:paddingBottom="@dimen/activity_vertical_margin" android:paddingLeft="@dimen/activity_horizontal_margin" android:paddingRight="@dimen/activity_horizontal_margin" android:paddingTop="@dimen/activity_vertical_margin" tools:context=".MainActivity"> ... Award-winning (or "reward-based") video ads are full-screen video ads that users have the option to view in full in exchange for rewards in the app. You won't see any change, but including Firebase and the Mobile Ads SDK is the first step to getting rewarded video ads in your app. How to install Google Mobile Ads SDK How to load and display a rewarded video ad How to reward a user for viewing video ad content Next steps Learn more Unless otherwise specified, content on this page is licensed under License Creative Commons Attribution 4.0 License, and code examples are licensed under the Apache 2.0 License. Currently, the button that gives the user the option to view an award-winning video ad is always visible. Looking for more? Add the XML element shown below to create a Button object, which when you click on it will display an ad. For this code lab, you will make ad requests at the unit value of test ad of ca-app-pub-3940256099942544/5224354917. This code lab will guide you through the integration of award-winning video ads into an existing Android mobile application, including design considerations, as well as implementation details, to follow best practices for award-winning video ads. For this code lab you will navigate to the Android directory. Unzip the downloaded zip file. Both working directories and final directories contain an Android project within a subdirectory RewardedVideoExample. However, we just want this bot^ not to be visible at the end of the game. In the onResume() method of MainActivity, check if the game is finished and if an ad is ready to be displayed. The final state of this code lab is in the final directory. Gradle updates its Libraries to include the dependency you just added. Import com.google.android.gms.ads.rewarditem; Import com.google.android.gms.ads.reward.RewardEdVideAad; Import com.google.android.gms.ads.Reward.RewardEdVideOadListener; ... The first step in adding the Firebase SDK to your Android project includes a Firebase configuration file ^ within your application^ MainActivity.java @Override Public Void OnResume () {MREWORDEDVideAad.resume

(this); super.onResume (); ... If you see a message, asking you to install the Google repository, simply accept the installation ^ and make Android Studio careful with the download for you. @Override Protected Void Oncreate (Bundle SavedInstancateState) {super.onCreate (SavedInstancestate); setContentview (r.layout.activity_main); Mobileads.initialize (getApplicationContext (), getString (r.string.admob_app_id)); // get reference to Singleton RewardVideo Object MREWORDEDVideAad = mobileads.getReweDVideOadInstance (this); } ... Add a call to this mA© all in the main class's OnCreate method () and save the reference to a private instance variable. The Google repository contains a ^ for you to build to incorporate. What you build in this CODELAB, you will integrate rewarded video ads â into the ^ app called "impossible game". The Android directory contains the start state for this CODELAB, located in the working directory. Watch the video for additional currencies ... PRIVER VOID STARTGAME () { ... Start by hiding this ^ at the beginning of each game, as shown ^ . Implement this all in the main class of the main class. MainActivity.Java @Override Public Void OnRewarded (Rewarditem Rewarditem) { // rewards the user for viewing the ad. For your convenience, a of a Google-Services.json file in this project. Private vacuum OnCreate (Bundle SavedInstancestate) { ... For more information, see the Google Developers Site Policies. Developers. Da ").
